4. FIRST AID MEASURES

First aid measures

Eye contact	Flush immediately with water for 15 minutes. Lift upper and lower eyelids for complete rinsing. Get immediate medical attention.
Skin Contact	Flush with water for 15 minutes. If irritation persists after rinsing, get medical attention. Remove contaminated clothing and wash before reuse.
Inhalation	Remove victim from immediate source of exposure to fresh air. If breathing is difficult, administer oxygen if available. If victim is not breathing, administer CPR. If individual experiences nausea, headache, or dizziness, get immediate medical attention.
Ingestion	Rinse mouth with water. Give water to dilute. Do not induce vomiting. Get immediate medical attention. Never give anything by mouth to a semi-comatose, comatose, convulsing or unconscious person.

Most important symptoms and effects, both acute and delayed

Symptoms	Inhalation of vapors is irritating to the respiratory system, may cause throat pain and cough. Risk of nose bleeding, chronic bronchitis. Eye contact is corrosive, may cause irreversible eye damage. Symptoms: redness, lachrymation, swelling of tissue. Skin contact causes irritation, possible burn. Ingestion causes severe irritation. Symptoms: nausea, abdominal pain, vomiting, diarrhea, risk of chemical pneumonitis.

5. FIRE-FIGHTING MEASURES

Suitable extinguishing media

Water. Water spray (fog).

Unsuitable extinguishing media None known.

Specific hazards arising from the chemical

Oxidizer. Hydrogen peroxide itself is noncombustible. On decomposition, it releases oxygen which may support combustion or intensify a fire. Oxidizing materials may cause spontaneous ignition with combustible materials. Contact with flammables may cause fire or explosion. Risk of explosion if heated under confinement.

Hazardous combustion products On decomposition product releases oxygen which may intensify fire.

Explosion data

Sensitivity to Mechanical Impact None.

Sensitivity to Static Discharge None.

Protective equipment and precautions for firefighters

As in any fire, wear self-contained breathing apparatus pressure-demand, MSHA/NIOSH (approved or equivalent) and full protective gear. Use water spray to cool fire exposed containers.

6. ACCIDENTAL RELEASE MEASURES

Personal precautions, protective equipment and emergency procedures

Personal precautions	Evacuate nonessential personnel. Ventilate area. Wear appropriate personal protection equipment.
Environmental precautions	See Section 12 for additional ecological information. Prevent run-off into ground or surface waters or sewers.
Methods for containment	Stop leak if you can do it without risk. Completely contain spilled material with dikes or sand bags, etc.
Methods for cleaning up	Soak up with inert absorbent material. Sweep up and shovel into suitable containers for disposal. Keep away from incompatible products. Never return spill to original container.

7. HANDLING AND STORAGE

Precautions for safe handling

Advice on safe handling Keep only in well-ventilated areas. Use only clean and dry utensils. Never return unused material to storage receptacle. Keep away from heat. Avoid inhalation, ingestion and contact with skin and eyes. Keep away from incompatible products.

Conditions for safe storage, including any incompatibilities

Storage Conditions Keep only in original container. Store in a well-ventilated place. Keep cool. Keep away from heat/sparks/open flames/hot surfaces. — No smoking. Store in a receptacle equipped with a vent. Keep container tightly closed. Keep away from incompatible products. Keep in a bonded area. Regularly check the condition and temperature of the container.

Incompatible materials Acids, bases, metals, salts of metals, reducing agents, organic materials, flammable substances.

Ventilation systems.

Individual protection measures, such as personal protective equipment

Eye/face protection	Wear protective splash proof safety goggles. Additional full face protection is recommended if splashing is a possibility.
Skin and body protection	Natural rubber, neoprene or nitrile gloves should be worn. Wear impervious protective clothing, including boots, gloves, lab coat, apron or coveralls, as appropriate, to prevent skin contact.
Respiratory protection	If exposure limits are exceeded or irritation is experienced, NIOSH/MSHA approved respiratory protection should be worn. Positive-pressure supplied air respirators may be required for high airborne contaminant concentrations. Respiratory protection must be provided in accordance with current local regulations.

General Hygiene Considerations Handle in accordance with good industrial hygiene and safety practice.
